PROFESSIONAL SUMMARY

AI Automation Specialist and GoHighLevel (GHL) Specialist with 3+ years of customer service experience and hands-on expertise designing CRM systems, workflow automations, sales funnels, and lead management solutions. Experienced in building end-to-end business systems using GoHighLevel, Zapier, OpenAI, and Google Workspace to automate repetitive tasks, improve customer engagement, and streamline operations. Passionate about creating scalable automation solutions that enhance business efficiency and customer experience.

CORE COMPETENCIES

- AI Automation
- GoHighLevel (GHL)
- CRM Administration
- Workflow Automation
- Customer Success
- Lead Management
- Pipeline Management
- Sales Funnels
- Marketing Automation
- Email Marketing
- SMS Marketing
- Calendar Management
- SOP Documentation
- Process Optimization
- CRM Migration
- AI Prompt Engineering
- Cross-functional Collaboration

TECHNICAL SKILLS

AI & Automation

- ChatGPT
- Claude
- Gemini
- GoHighLevel AI
- Zapier

CRM & Customer Management

- GoHighLevel (GHL)
- Salesforce
- Zendesk

GoHighLevel Expertise

- CRM Setup
- Pipelines
- Opportunities
- Smart Lists
- Workflows
- Automations
- Landing Pages
- Websites
- Funnels
- Forms
- Surveys
- Calendar Setup
- Email Campaigns
- SMS Campaigns
- Reputation Management
- Custom Values
- Custom Objects
- Lead Routing
- Lead Tagging
- Opportunity Management

PROFESSIONAL EXPERIENCE

Customer Service Representative (2022 - 2025)

- Delivered exceptional customer support through phone, chat, and email while maintaining 95–100% Customer Satisfaction (CSAT) and 95–100% Quality Assurance (QA) scores.
- Managed 50–100 inbound calls, 30–50 live chat conversations, and 10–20 email inquiries daily while maintaining accuracy and professionalism in high-volume environments.
- Resolved customer concerns efficiently, achieving a 95–98% First Call Resolution (FCR) rate while maintaining an Average Handle Time (AHT) of under six minutes.
- Maintained accurate customer records, documented interactions, and managed case resolutions using CRM platforms including Salesforce and Zendesk.
- Collaborated with internal departments to investigate complex customer concerns and ensure timely issue resolution.
- Consistently achieved 100% monthly attendance while meeting company service level agreements (SLAs), quality standards, and performance metrics.

Data Encoder (2025 - 2026)

- Entered and maintained customer and business records with 95–100% accuracy while ensuring data integrity and consistency.
- Organized digital files, maintained spreadsheets, and managed business documentation using Google Sheets and Microsoft Office.
- Assisted with appointment scheduling, calendar management, and administrative support to improve daily operational efficiency.
- Verified data accuracy before submission, reducing errors and maintaining organized business records.

PORTFOLIO PROJECTS

Dental Practice CRM & AI Automation System

- Designed and implemented end-to-end GoHighLevel CRM systems for small business workflows, streamlining lead management from initial inquiry through customer conversion, appointment scheduling, and post-engagement follow-up.
- Engineered scalable CRM architecture, including multi-stage sales pipelines, opportunity management, Smart Lists, custom fields, tags, and lead segmentation to improve customer organization, sales visibility, and lifecycle management.
- Built and optimized automated workflows for lead capture, qualification, appointment scheduling, confirmations, reminders, cancellations, no-show recovery, and follow-up campaigns, reducing manual administrative tasks and improving operational efficiency.
- Developed personalized email and SMS automation using conditional workflow logic, AI-assisted customer communication, and prompt engineering to automate engagement, qualify leads, and deliver timely customer interactions.
- Created high-converting landing pages, lead capture forms, surveys, calendars, and booking systems while integrating Zapier and third-party applications to automate CRM updates, internal notifications, and cross-platform data synchronization.
- Performed end-to-end workflow testing, troubleshooting, quality assurance, and system documentation, creating scalable automation solutions, SOPs, and repeatable processes that improve reliability, simplify maintenance, and support future business growth.

Technologies: GoHighLevel • Zapier • ChatGPT • Claude • Google Workspace

AI Workflow Automation Portfolio

- Designed and implemented cross-platform automation workflows using Zapier to connect CRM systems with third-party applications, enabling seamless data synchronization and eliminating manual data entry.
- Engineered automated lead management processes that captured, qualified, routed, and updated contacts while triggering follow-up communications, task assignments, and internal notifications based on customer actions.
- Built AI-assisted operational workflows leveraging prompt engineering and automation logic to process information, support customer communication, automate repetitive tasks, and improve operational efficiency.
- Configured conditional workflow logic, filters, and multi-step automations to ensure accurate data routing, reduce workflow bottlenecks, and maintain consistent business processes across integrated platforms.
- Performed end-to-end testing, troubleshooting, and workflow optimization to validate automation performance, resolve integration issues, and ensure reliable execution.
- Created comprehensive SOPs, workflow diagrams, and process documentation that clearly mapped automation logic, system architecture, and business processes to support scalability and knowledge transfer.

Technologies: Zapier • GoHighLevel • ChatGPT • Claude

CRM & Funnel Management Project

- Designed and implemented end-to-end customer acquisition systems using GoHighLevel, including landing pages, lead capture forms, surveys, sales funnels, and automated follow-up campaigns to streamline lead generation and conversion.
- Configured CRM pipelines, opportunity management, Smart Lists, tags, custom fields, and customer communication workflows to improve lead organization, visibility, and sales pipeline management.
- Engineered automated lead routing and segmentation workflows using custom values, conditional logic, and workflow automation to assign contacts, trigger personalized follow-ups, and reduce manual intervention.
- Developed multi-channel email and SMS nurture sequences that maintained consistent customer engagement throughout the lead lifecycle, from initial inquiry to appointment booking and conversion.
